## Information about the EcoStep Certificate

EcoStep is an integrated, process-oriented management system for small and medium-sized enterprises. It meets the core requirements of the internationally recognised ISO standards for quality management, environmental management and occupational health and safety in companies.

EcoStep is an integrated management system in the non-accredited sector. The verification of conformity regarding the core requirements laid down for EcoStep is carried out by an audit with appointed auditors from GUT Zertifizierungsgesellschaft für Managementsysteme mbH.

EcoStep is a practice-oriented alternative to the conventional ISO standards. Combined in one system, it uses the most important standard requirements of the following standards from an SME perspective

**DIN EN ISO 9001:2015 Quality management**

**DIN EN ISO 14001:2015 Environmental management**

**DIN ISO 45001:2018 Occupational health and safety**

EcoStep uncovers potentials for cost reduction, implements controlling and key figure systems to support management and increases legal certainty.

In this way, process orientation is promoted in companies and the basis for sustainable development is created through integration of the systems.
